PRESS RELEASE

USA Netball Association (“USANA”) to Restructure Netball in America

Major overhaul of operational and technical program expected to enhance rankings and prominence of the sport throughout the USA.

Orlando, FL, September 1, 2011: The USA Netball Association today announced it will undertake a major restructuring effort. The restructuring program will be aimed at increasing operational efficiency, promoting nationwide development of the sport and sourcing sustainable funding for the organization and its various initiatives. Currently, netball is the leading women’s sport played by over 20 million women worldwide.

Since its founding in 1992, USANA has worked diligently to promote netball across the USA. As a result of those efforts, the number of women playing netball within the country has grown exponentially. Additionally, USANA has been the driving force behind the development of an internationally competitive netball program in the United States, training and preparing senior and junior teams for national and international competitions.

To further its commitment and to enhance its effectiveness, USANA will undergo a six (6) phase restructure of its operational and governing structure. This process is intended to be a comprehensive reform of netball in the USA and will provide netball enthusiasts throughout the country an opportunity to make meaningful contributions to this project. Table 1 below illustrates the six phase restructuring process.
